

BCA VI SEMESTER PROJECT

EventHub

Advanced Event Management & Ticketing Solution

Presented by:

Aditya Singh

Roll No: 2301031601007 (Lead)

Team: Aditya Verma, Shreyansh Tiwari | Session 2025-26

Project Vision

EventHub is designed to revolutionize the event discovery and ticketing experience in India. We aim to provide a premium, localized, and high-performance platform that bridges the gap between event organizers and attendees.

- ◆ Localized for Indian Market (INR, Local Venues)
- ◆ High-Fidelity Visual Excellence
- ◆ Seamless Mobile-First Architecture
- ◆ Built-in Security & Fraud Prevention

Double-Sided Marketplace

FOR ATTENDEES

- ◆ Seamless Discovery
- ◆ Instant QR Ticketing
- ◆ Calendar Integration
- ◆ Interactive Maps

FOR ORGANIZERS

- ◆ Real-time Dashboard
- ◆ Sales Analytics
- ◆ Attendee Management
- ◆ Secure QR Check-in

Attendee Experience

◆ Smart Discovery: Category-based events with dynamic theming.

◆ Digital Vault: Instant access to all booked tickets in a personal profile.

◆ 1-Click Sync: Export events directly to Google/Apple calendars (ICS).

◆ Venue Navigator: Integrated Google Maps for precise location tracking.

Organizer Tools

◆ **Sales Intelligence:**
Interactive charts showing revenue growth and ticket trends.

◆ **Data Sovereignty:**
One-click CSV export for all sales and attendee records.

◆ **Door Management:**
Mobile-ready QR scanner for instant entry validation.

◆ **Event Control:**
Dynamic pricing and inventory management system.

Technical Architecture

React 18

Frontend Library

TypeScript

Type Safety

Vite

Build System

Tailwind CSS

Atomic Styling

Lucide React

Iconography

Recharts

Data Visualization

Zustand

State Management

jsPDF

Document Gen

Vercel

Deployment

Design Philosophy

We followed a "Mobile-First, Content-Forward" approach:

- ◆ Glassmorphism: Using frosted-glass effects for depth.
- ◆ Micro-animations: Improving engagement via subtle hover/entry effects.
- ◆ Semantic Structure: Ensuring accessibility and SEO compliance.
- ◆ Responsive Layout: Flawless experience across all devices.

The Roadmap Ahead

PHASE 1
Payment
Gateway
Integration
(Razorpay)

PHASE 2
Native
Mobile App
(React
Native)

PHASE 3
AI-Powered
Event
Recommendations

Thank You
